

Product Twister

The APOLLO Product Twister is an innovative conveyor for in-line rotating of cases and other unitised loads. The loads can be rotated 180° or 90° in a continuous motion. This conveyor is used in packing lines where products need to be rotated upside down or to one side without delay or product damage. The APOLLO Product Twister can accommodate a wide range of load sizes without adjustment.

The Facts

- Low friction operation
- Built in protection
- 50 kg/m
- 60 m/minute
- Small footprint

Technical specifications

Belt widths	200, 300, 400, 500 and 600
Rotation	90° or 180° clockwise or counter clockwise
Length of one unit 90°	3.000 mm*
Length of one unit 180°	5.600 mm*

*Depending on product dimensions
